EDUCATION

University of Manitoba   Winnipeg, MB
Bsc. Computer Science, Minor in Statistics   *Jan 2025 – Present*

EXPERIENCE

Front end Developer   Jan 2025 – March 2025
HNG organization   *Lagos, NG*
- I gained valuable experience working with teammates from various tracks, including frontend, backend, design, and DevOps. This taught me how to communicate effectively, integrate diverse contributions, and work toward a common goal.
- During the internship, I expanded my skill set by learning new technologies like Next.js, TypeScript, and Tailwind CSS, enhancing my proficiency in building scalable, high-performance web applications.
- I improved my Git and GitHub skills by actively contributing to collaborative projects, managing branches, creating pull requests, and implementing feedback from code reviews to improve the quality of my work.

Web Developer   Feb 2025 – Present
CCUBED Organization   *Winnipeg, MB*
- I am working on developing a website that focuses on creating a visually appealing user interface, incorporating smooth animations and attractive design elements to enhance user experience.
- I am gaining experience in integrating 3D animations into web applications, experimenting with libraries and frameworks that support 3D rendering.
- I am improving my ability to collaborate effectively with teammates from various backgrounds to achieve a cohesive and high-quality website design.

PROJECTS

Shopdesk | *Nextjs, FastAPI, TypeScript, TailwindCSS*   Jan 2025 – April 2025
- Developing a Shopdesk project aimed at helping users keep track of their sales and stock seamlessly
- Utilizing FastAPI for building efficient, high-performance APIs to handle data processing and server-side operations.
- Using Next.js for server-side rendering, improved SEO, and TypeScript for better type safety and code maintainability.
- Focusing on providing a clean and intuitive user interface with responsive design principles, leveraging Tailwind CSS for styling
